Lock Down Browser in Sakai (steps to install)  {on windows XP}

1) In some assessments you will use the Respondus LockDown Browser, you have to click on the [Click here to download] if you have not yet installed lock down browser on you computer.

2) You will then be directed to Respondus web site for the software install.

3) I was on my home computer when I tested this procedure, so I chose [your own computer]

7) Pick Language:

8) Click Next

9) You must accept the license and click Next:

10) Choose destination:

11) Then click Next:

12) Click Install:

by: David DePatie
13) Click Finish:

Now to use the Lock Down Browser you must find the application in your program list.

The icon looks like:

![Lock Down Browser Icon](image)

You might have to re-login.

If you are running a VPN, Respondus will make you disconnect first.

Hope this helps
